Rehabilitation Research & Training Center  
for Evidence Based Practice in Vocational Rehabilitation

***"In what areas related to EBP in Vocational Rehabilitation do you believe you would benefit from receiving more information and training?"***

The primary area identified is disability-specific strategies connected with successful employment outcomes. Noted was information specific to working with individuals with:

- Mental illness
- Substance abuse
- Learning disabilities
- Autism
- Traumatic brain injury/Developmental disability
- Deaf and Hard of hearing
- Transition-age youth

Additional areas identified included employer needs and labor market demands; professional skill development in the areas of counseling practices, consumer motivation, and Motivational Interviewing; and job placement and supported employment. Assessment also emerged as an important area where information on evidence-based strategies and practice will be helpful.
